TO WHOM SO EVER IT MAY CONCERN

Our ground handling team at Dubai (DXB) airport currently has two Hydro towbars (model TOWUNIV8S20SH1) in service since February 2019.

They have been performing very well thanks to their flexibility in service for aircraft ranging from A350 to B777/787.

We're very satisfied with the technical support and service we have received from Hydro during and after the warranty period.

Thanks & Regards,

Robert Powell

Vice President – Technical Services dnata
