Wide range of OEM capabilities

In partnership with

Local tool service for Asia-Pacific

Tool repair and servicing capabilities are now available for our Asia-Pacific customers. Our partner - HYDRO Systems KG – has a new facility located in Singapore. The local availability means transport times, turnaround times and costs are reduced to a minimum.

OEM engineering know-how

Our Partner has more than 50 years' experience in tooling and provides dedicated services for maintenance, repair and modifications in the APAC region. Based on OEM design and engineering know-how, we guarantee the highest level of quality in workmanship.

Lease options

Airbus tool lease services are available from one of our warehouses to support you during the maintenance or upgrade period.
